ABOUT ME

I am an AI/ML student with a strong interest in data-driven technologies and intelligent systems. I am currently focused on building my skills in machine learning, data analysis, and developing basic models.
In addition to AI/ML, I have experience in web development using HTML, CSS, and JavaScript. I enjoy building small projects that solve real-world problems and help strengthen my practical understanding.
For extracurricular activities, I actively explore new technologies, participate in coding challenges, and show interest in hackathons and team-based projects. I enjoy working in collaborative environments and continuously strive to improve my skills.
